Experience

DevOps Engineer · **Ascend Cloud** (Contract) 2025 — Present

- Designedd cost effective Kubernetes clusters on AWS & Azure for multiple clients
- Utilized Databricks for large-scale ETL pipelines for an ECommerce client
- Developed secure IaC templates and automated CI/CD with GitHub Actions and Helm for a retail client
- Configured observability with Prometheus, Grafana, Loki, OpenTelemetry for a retail client
- Finetune ASR and SST models on custom dataset for handling customer queries

DevOps Trainer · **Tech Axis** (Contract) 2026 — Present

- Designed and taught devops curriculum
- Taught Linux, Containers, CI/CD, Kubernetes, AWS, Observability, IaC, DevSecOps
- Help design an Agentic AI curriculum

Backend Developer · **Bitmosys** (Fulltime) 2024

- Architected ERP infrastructure with high availability Postgres cluster, Redis caching, and Nginx API gateway
- Implemented Linkerd service mesh for secure service-to-service traffic and monitoring
- Built self-managed observability stack (Grafana, Prometheus, Loki)
- Deployed with Docker + Kubernetes, automated with CI/CD
- Built and custom schedule planner staff shift assignment with multiple constraints and preferences
- Built a custom permission managent system with audit logging capable of handling 1M+ objects and their audit logs

Fullstack Developer · **Cango** (Contract) 2023 — 2024

- Developed dynamic dashboards with React, React Query, Zustand, and Tailwind
- Built a reusable component library for a political survey platform
- Integrated backend APIs with PostgreSQL and Redis
- Created data visualizations with Apache ECharts
- Refactored legacy codebase into modular TypeScript for maintainability

Frontend Developer · **Matrice AI**(Fulltime) 2022 — 2023

- Developed backend services for image annotation platform deployed on AWS
- Optimized Next.js landing page, achieving < 500ms time to interactive
- Refactored annotation dashboard with React + Tailwind to align with new UI/UX
- Integrated observability hooks for real-time monitoring

Technical Skills

Languages TypeScript, JavaScript, Python, SQL

Databases & ORM PostgreSQL, MySQL, MongoDB, Redis, Prisma

Cloud & Infra AWS, Azure, Docker, GitHub Actions, Azure Pipelines, Terraform

Observability Prometheus, Grafana, Loki, OpenTelemetry, Jaeger

Kubernetes Helm, ArgoCD, Trivy, Harbor, Istio, Falco, CloudNativePG

Familiar Databrick, Kubeflow, Pytorch, Kafka

Projects

Linite

Bulk install Linux apps with a single command

InfraWise

Financial modeling tool for TCO comparison between cloud and on-prem infra.

Education

Kantipur Engineering College

Bachelor of Engineering, Computer Engineering 2018 — 2022
